Lite Evo Console is an extremely versatile console due to its high adaptability to any control center. It can be the lightest console or become the highest capacity console by simply combining compartments.

Integrates the **4YC Control Status** to manage environment, workstations and the console itself thanks to sensors and actuators.

FEATURES

- ✓ Maximum versatility.
- ✓ Great connectivity between compartments.
- ✓ Easy adaptation to requirements.
- ✓ Lift / Stand position
- ✓ High storage
- ✓ Integration of 4YC Console Status.

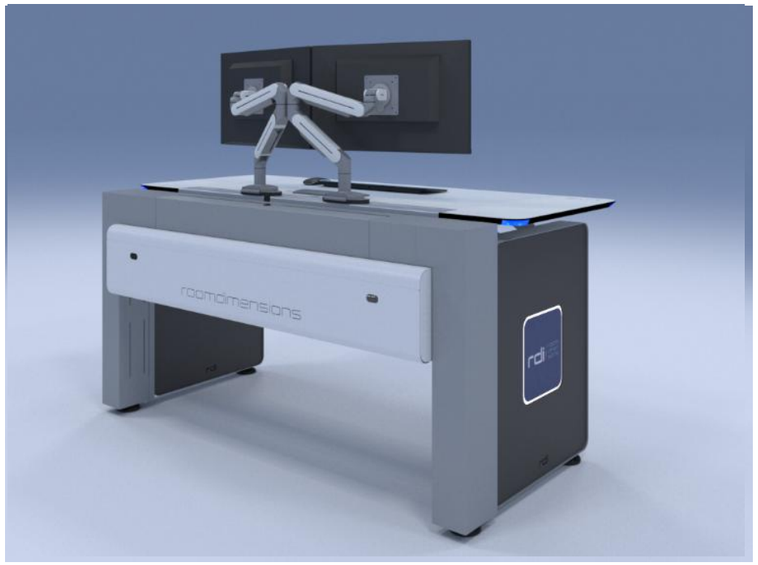
LITE v3 is a premium product with first-class features. Its main objective is to ensure the proper arrangement of various ergonomic elements at the workstation, as well as the organization of structured cabling and existing connectivity points within the FUNCTIONAL ARC, keeping the work area visually clean.



FEATURES

- ✓ On board connectivity
- ✓ Excellent cabling management
- ✓ Functional Arch: structural element which distributes the cabling along the console
- ✓ Customisable corporate sides
- ✓ Ergonomics: Allows to combine the operator position: **sit or stand**. From 722mm lower position (sit) to 1140 mm upper position (stand)
- ✓ Rail for monitor bracket integration

The V-Concept console is based on a simple, dynamic, lightweight and minimalist design. The design of the structure is totally modular, with all its elements integrated into its characteristic "V" shape in section.

This allows the creation of multiple posts where communication between the different operators is facilitated.

FEATURES

- ✓ Clean design lines with HPL covers around the structure.
- ✓ 2 main connectivity areas: Table board zone for the operator and sides of operators for equipment
- ✓ Easy modularity that maximaze the creation of multiple workposts with full cabling communication
- ✓ Working area with back panel and cover that helps create specific space for each operator
- ✓ Easy and flexible monitor placing insde the cable duct

T-Line Console is based on a simple, rounded, balanced and robust conception. A careful research of ergonomics takes into account the fitting of the operator's legs and feet into the base of the console, allowing always a comfortable position. Totem structure for simple management of cabling and equipment and monitor structure to increase ergonomics.

FEATURES

- Totem structure with movable shelf or standard 19" mounts
- Access to the consoles structure through doors and covers to manage cabling and all the elements
- Monitor structure with horizontal aluminium rail to move brackets horizontally and space for extra equipment
- Console design improves operator position & free movement of feet
- Compartments under the worksurface to store keyboard, mouse or office supplies

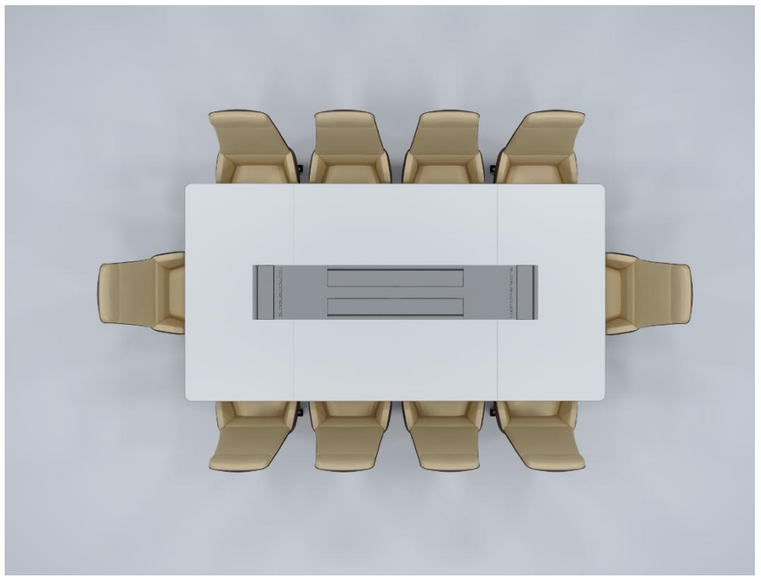
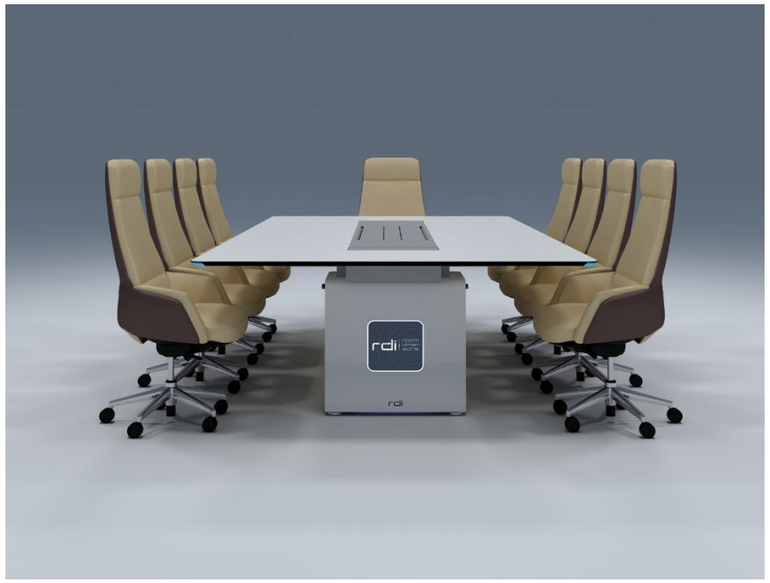
Open technical solution for meeting and crisis environments where it is required the integration of computer equipment and to locate AV accessories in specific points of the table. The solution integrates a range of closed compartments distributed along the table. The user has access to the connectivity zone, from the upper area.





FEATURES

- Table equipped with a central unit that contains power & data connectors
- The cable duct manages all the wiring from the surface to the compartments
- Electronic compartment destined to house the computer equipment being accessible from the front and back
- The structure itself serves for housing small electronic equipment
- Decorative led lighting applied on each corner of the table board

It is the ideal complement to create adjacent meeting areas of the control centers, where a simple plug-in is required to create common work areas with the necessary connectivity elements well integrated and effortless for the user. Unlike the Type C, it also has space destined to house computer equipment.

FEATURES

- Central cover fully removable for managing the wiring
- Longitudinally open space to facilitate the entry and exit of wiring cables to the surface of the table
- Desktop unit power, data and USB sockets for the operators. (4x energy and 4x data in every column.)
- Central space between structural feet destined to house computer equipment
- Led lighting on the bottom

DD Console is a range of technical furniture specifically designed for environments where compact consoles are needed with yet a high technical capacity. Even with its reduced dimensions, keeps all the ergonomic factors that make the user comfortable in any case. The structure is optimized to give technical usability by keeping great aesthetics within 24x7 environments.

FEATURES

- ✓ Compact console with high capacity that allows the distribution and management of structured cabling and the location of electronic components
- ✓ Specially designed for reduced places that require the same market parameters required for control centers
- ✓ Keeps all the ergonomic factors that make the user comfortable in any case
- ✓ Designed for emergency centers, security rooms or railway, transit port and airport control centers

The **AudioVisual Totem** is intended to the integration of large format monitors, allowing the creation of self standing videowalls composed of flat screens. It is a highly useful solution especially for those operations environments which require self standing solutions capable of managing the electronic equipment and all the infrastructure inside the totem body.

Ref.: AV-T01X1/55

Ref.: AV-T02X2/55

Ref.: AV-T01X2/5

FEATURES

- Ideal for limited spaces as a substitute of the classic VideoWall
- The 1x1 and 2x1 version with wheels facilitate even more its mobility
- Space destined to house electronic devices on the lowest part with front door access
- Easy adaptation of any kind of monitor size thanks to the VESA support system
- The wiring is completely hidden inside the structure

The **Smart Podium** is a working point raised above its surroundings with the aim to locate a speaker. It contains all the necessary elements to carry out a speaking, a meeting or a conference, such as a place to house a small pc, integration of a screen in the work surface, different connectivity points or place for office supplies. The cabling management has proven its added value.

Ref.: PO-SV2/ES3

Ref.: PO-SV2/ES1

Ref.: PO-SV2/ES2

FEATURES

- 23" monitor integrated
- Hinged cover with access to the structure and connections
- Space for office supplies
- Connection set can be customized with several connectors such as HDM, VGA, 3.5mm sound, USB, Power and rj45 data
- Retractable surface to hide monitor
- Keyboard and mouse storage.
- 19" mounts in both sides to locate power or data sockets to feed the pc inside
- Metal trays to locate the pcs or equipment
- Cable pass-through structure
